Battery charger QUINT CHARGER, Screw connection, DIN rail mounting, input: 1-phase, output: 24 V DC / 10 A

Product description

With the QUINT CHARGER, the additional charger for QUINT DC UPS, both lead and lithium batteries can be charged more quickly. The temperature-optimized charging process increases the service life of the battery module, while the higher charging current reduces the charging time. The two devices communicate via system communication, the coordinated system for optimized battery charging. The charging parameters are configured via the USB interface. The battery status is indicated via LEDs and signal contacts.
