SWITCHES PLUS COMPONENTS

Contactors & Relays

2027

Industrial electrical, automation and control products, including hard-to-source and specialist components, backed by technical expertise.

Switches Plus Components

SWITCHES PLUS COMPONENTS

Switches Plus Components is an Australian-owned specialist supplier of industrial electrical, control and automation products, supporting customers across Australia.

We've been working with switchboard builders, OEMs, machine builders, industrial electricians and engineers for more than 40 years, supporting projects where product selection, system integration and long-term performance all matter.

We act as the Australian distributor for over 40 suppliers, with over 10,000 items on our wesbite, and 5,000+ products stocked in our warehouse from leading global manufacturers, known for their quality, reliability and performance in industrial applications.

What We Do

We supply a broad range of industrial electrical, automation and control components suited to your application requirements, whether standard or specialist.

Our role extends beyond supplying part numbers. We focus on solving application challenges, ensuring product decisions align with system design, operating conditions and long-term performance requirements.

Access Specialist and Hard-to-Source Products

Not all projects align with standard, catalogue-based supply. Switches Plus supports applications where system constraints, integration requirements and operating conditions influence product selection. This includes sourcing specialist and hard-to-source components where only specific or niche products will meet the requirements of your application.

Work with a Technically Informed Team

Our team understands the industries our customers work in and how those environments shape product requirements. They work alongside you to provide practical technical input, so product decisions are based on what will perform in your application, not just what's available.

Industries and Applications

Switches Plus Components serves a wide range of customers and industries. Our customers include electrical contractors, switchboard builders, machine builders (OEMs), engineers and system integrators who work across many industries including:

- Defence
- Industrial automation
- Manufacturing plants
- Mining operations
- Utilities
- Infrastructure projects
- Renewable Energy
- Electrical Contractors

These are environments where product selection, technical input and operating conditions directly influence system performance and service life.

Our Mission

We make it easier for our customers to get the right industrial electrical, automation and control products for their application, so they can deliver reliable systems.

Our Vision

To contribute to reliable, well-performing industrial systems across the industries we support.

How We Work

We work from your application requirements
Product selection is guided by how your system is designed, built and expected to perform.

We focus on what will work in your application
Decisions are based on system requirements, operating conditions and long-term performance, not just availability.

We bring practical technical input
Our team understands the industries you work in and provides input that reflects how systems are built, installed and used.

We source beyond standard options when needed
We source components suited to your application, not limited to standard product ranges.

We work alongside you throughout the project
We respond quickly, communicate clearly and work with you to keep things moving.

National Coverage

Switches Plus Components supplies customers across Australia and New Zealand, supporting projects in metropolitan, regional and remote locations.

Switches Plus Components

SWITCHES PLUS COMPONENTS

Our Brands

We work with a global network of suppliers, providing access to established brands used across industrial applications.

Product Range

We offer a wide range of industrial electrical components and automation solutions, from consumables through to specialised technical products. This includes both standard stocked products and specialist components sourced for applications where standard options do not meet your requirements.

Products are selected with compliance to relevant standards and appropriate IP ratings in mind, ensuring suitability for industrial environments and application requirements. Our product range includes:

- Automation Components
- Beacons & Alarms
- Cable
- Cable Management & Accessories
- Circuit Protection
- Connectors
- Contactors & Relays
- Enclosures
- Switches
- Terminals & Distribution Devices
- Timers & Monitoring Relays
- Transformers & Power Supplies

Switches Plus Components was established in 1997 through the strategic merger of C&K Electronics and Jesec Switches Plus. This union brought together more than 40 years of combined industry expertise, establishing our position as a market leader in electronic components.

A pivotal moment came in November 2012 when Switches Plus evolved from a traditional electronics components supplier into a comprehensive industrial solutions provider, transforming the company's trajectory and market presence. In February 2025, Switches Plus Components entered an exciting new chapter when it was acquired by Dore Electrics, a move that significantly strengthens the company's footprint in the Industrial Electrical and Automation market.

The partnership with Dore Electrics enhances our ability to deliver comprehensive electrical solutions while maintaining the high standards and customer-focused approach that has defined Switches Plus Components for over four decades.

Catalogues

Looking for something not in this catalogue? Don't worry, we have over 5000 stocked lines, and access to thousands more!

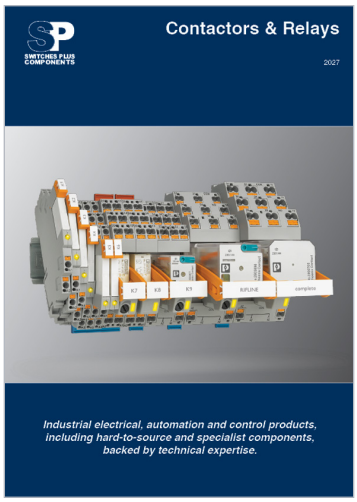

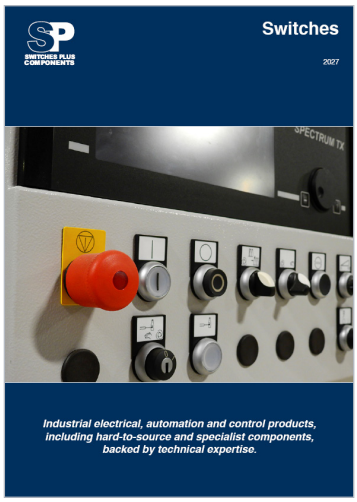

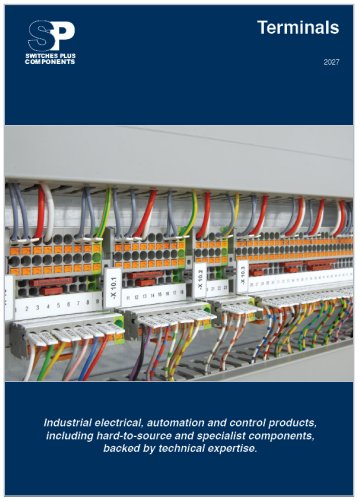

Motor Protection Switch

CUBICO Motor Protection Switch

CUBICO Series - Frame size 0

To safeguard motors from thermal overload, it is best to use a motor protection switch. Its fuseless construction, makes the motor protection switch a very cost-efficient type of protection with a small footprint. It also makes sure that the motor is shut down very quickly in case of a short circuit. Even with one or two live wires failing, the motor protection switch will disconnect within milliseconds to protect the motor from harm.

Part Number	Current Range	Power (kW)
BE200100	0.63-1A	0.25
BE200160	1-1.6A	0.55
BE200250	1.6-2.5A	0.75
BE200400	2.5-4A	1.5
BE200630	4-6.3A	2.2

Phoenix Industrial Relays

You can carry out all standard relay applications using the RIFLINE complete industrial relay system. It doesn't matter whether you want to isolate, multiply or amplify signals. The relay system, with a consistent plug-in design, ensures high machine and system availability. The area of application ranges from coupling and timer relays through to the small power contactor replacement.
